nopCommerce 4.70.2 changelog

This is a minor release that is fully compatible with the previous versions (4.70.0-4.70.1). So all third-party plugins and themes for 4.70 work for all minor versions (4.70.0-4.70.2). It contains the following bug fixes and enhancements.

- #7221 Added data encoding into JSON-LD
- #7217 Fixed sending test email of the message template
- #7211 Fixed incorrect region update when address validation is enabled in Avalara tax
- #7209 Fixed saving customer roles when importing customers
- #7206 Fixed auto-adding required products when the RequireOtherProducts is disabled
- #7205 Fixed validation of pickup point lat/lon fields in the admin area
- #7202 Fixing product attribute combinations stock quantity history when copying a product with combinations
- #7203 Suppressed clearing the form when entering the wrong billing/shipping address on the checkout page
- #7201 Fixed an issue with the location of pinned scripts when nopCommerce is hosted in a virtual directory
- plugin
- #7161 Updated Brevo API to the latest version
